

50 56 Gusti Ngurah P Jurnal

Beginning with 1953, entries for Motion pictures and filmstrips, Music and phonorecords form separate parts of the Library of Congress catalogue. Entries for Maps and atlases were issued separately 1953-1955.

Biography of Ida Bagus Mantra, 1928-1995, an Indonesian prominent figure in Balinese culture.

This book provides new data and perspectives on the development of 'world religion' in post-colonial societies through an analysis of the development of 'Hinduism' in various parts of Indonesia from the early twentieth century to the present.

This development has been largely driven by the religious and cultural policy of the Indonesian central government, although the process began during the colonial period as an indigenous response to the introduction of modernity.

Functional Lipid Nanosystems in CancerCRC Press

Deals with examples of Buddhist and Sivaite dvarapalas or temple-guardians from mainland Southeast Asia, compared to examples from Indonesia which are still in situ, that is to say on their original location, within the architectural layout of Buddhist and Sivaite sanctuaries.

A practical guide to selecting and applying the most appropriate model for analysis of cross section data using EViews. "This book is a reflection of the vast experience and knowledge of the author. It is a useful reference for students and practitioners dealing with cross sectional data analysis ... The strength of the book lies in its wealth of material and well structured guidelines ..." Prof. Yohanes Eko Riyanto, Nanyang Technological University, Singapore

"This is superb and brilliant. Prof. Agung has skilfully transformed his best experiences into new knowledge ... creating a new way of understanding data analysis." Dr. I Putu Gede Ary Suta, The Ary Suta Center, Jakarta

Basic theoretical concepts of statistics as well as sampling methods are often misinterpreted by students and less experienced researchers. This book addresses this issue by providing a hands-on practical guide to conducting data analysis using EViews combined with a variety of illustrative models (and their extensions). Models having numerically dependent variables based on a cross-section data set (such as univariate, multivariate and nonlinear models as well as non-parametric regressions) are concentrated on. It is shown that a wide variety of hypotheses can easily be tested using EViews. Cross Section and Experimental Data Analysis Using EViews: Provides step-by-step directions on how to apply EViews to cross section data analysis - from multivariate analysis and nonlinear models to non-parametric regression Presents a method to test for all possible hypotheses based on each model Proposes a new method for data analysis based on a multifactorial design model Demonstrates that statistical summaries in the form of tabulations are invaluable inputs for strategic decision making Contains 200 examples with special notes and comments based on the author's own empirical findings as well as over 400 illustrative outputs of regressions from EViews Techniques are illustrated through practical examples from real situations Comes with supplementary material, including work-files containing selected equation and system specifications that have been applied in the book This user-friendly introduction to EViews is ideal for Advanced undergraduate and graduate students taking finance, econometrics, population, or public policy courses, as well as applied policy researchers.

Do you want to recognize the most suitable models for analysis of statistical data sets? This book provides a hands-on practical guide to using the most suitable models for analysis of statistical data sets using EViews - an interactive Windows-based computer software program

for sophisticated data analysis, regression, and forecasting - to define and test statistical hypotheses. Rich in examples and with an emphasis on how to develop acceptable statistical models, Time Series Data Analysis Using EViews is a perfect complement to theoretical books presenting statistical or econometric models for time series data. The procedures introduced are easily extendible to cross-section data sets. The author: Provides step-by-step directions on how to apply EViews software to time series data analysis Offers guidance on how to develop and evaluate alternative empirical models, permitting the most appropriate to be selected without the need for computational formulae Examines a variety of times series models, including continuous growth, discontinuous growth, seemingly causal, regression, ARCH, and GARCH as well as a general form of nonlinear time series and nonparametric models Gives over 250 illustrative examples and notes based on the author's own empirical findings, allowing the advantages and limitations of each model to be understood Describes the theory behind the models in comprehensive appendices Provides supplementary information and data sets An essential tool for advanced undergraduate and graduate students taking finance or econometrics courses. Statistics, life sciences, and social science students, as well as applied researchers, will also find this book an invaluable resource.

Pembahasan yang disajikan sangat integred, yaitu menggabungkan analisis sistem, desain sistem, dan pembuatan sistem. Sistem yang dibuat adalah sistem distributor. Untuk desain sistem menggunakan Data Flow Diagram (DFD) dan Entity Relationship Diagram (ERD). Konsep pemograman yang digunakan dengan konsep terstruktur memakai Visual Basic.Net. Aplikasi distributor yang dibuat meliputi pembuatan invoice, pembuatan purchase order, biaya usaha, pelunasan hutang, pelunasan piutang, rugi/laba, dan lain-lain. Untuk memudahkan dalam memahami materi maka setiap bahasan dilengkapi dengan latihan mandiri dan source program menggunakan Visual Basic.Net Buku ini sangat cocok untuk kajian karya ilmiah, penelitian, modul pembelajaran, pembuatan skripsi, tesis, pengembangan proyek sebagai konsultan sistem informasi. Pembahasan dalam buku mencakup: - Alat bantu desain Sistem DFD dan ERD - Desain sistem dengan Data Flow Diagram - Desain Data dengan Entity Relationship Diagram - Program Distributor dengan Visual Basic.Net - Pembuatan Laporan dengan Crystal Report

The International Handbook of Research on Teachers and Teaching provides a fresh look at the ever changing nature of the teaching profession throughout the world. This collection of over 70 articles addresses a wide range of issues relevant for understanding the present educational climate in which the accountability of teachers and the standardized testing of students have become dominant.

Merancang Aplikasi dengan Metodologi eXtreme Programmings ini membahas pengembangan aplikasi dengan metodologi eXtreme Programming disertai dengan studi kasus pembuatan aplikasi untuk laporan keuangan klinik dengan konsep pemrograman berorientasi objek menggunakan VB.Net. Setiap tahapan pada eXtreme Programming dibahas secara detail. Aplikasi laporan keuangan klinik yang dibuat meliputi pembuatan daftar perkiraan, saldo awal, jurnal umum, AJP, buku besar, buku besar AJP, neraca saldo, neraca saldo AJP, neraca lajur, laporan rugi/laba, perubahan ekuitas, laporan neraca, dan lain-lain. Untuk memudahkan, setiap bahasan dilengkapi dengan latihan mandiri dan source program menggunakan Visual Basic.Net. Buku ini sangat cocok untuk jurnal/kajian karya ilmiah, penelitian karya ilmiah, prosiding, modul pembelajaran, materi ajar perkuliahan, pembuatan skripsi, tesis, disertasi, dan pengembangan proyek. Pembahasan dalam buku mencakup: - Dasar-dasar siklus

akuntansi - Perkembangan tahapan pengembangan sistem - Perkembangan desain sistem - Konsep pemrograman prosedural dan berorientasi objek - Metodologi eXtreme Programmings - Program laporan keuangan klinik dengan Visual Basic.Net - Pembuatan laporan dengan Crystal Report

Cancer remains one of the most challenging issues in modern medicine, being responsible for a high number of deaths every year. Recent important developments in cancer diagnosis and therapy based on the versatility of nanosystems have made it possible to incorporate multifunctional synergistic actions into a single delivery system. This book compiles the research on the use of functional lipid nanosystems that combine different strategies in one single nanosystem to enhance overall cancer treatment. Besides providing an overview of the current functional nanosystem strategies, it also offers researchers essential theoretical background on cancer, the physiological barriers to its treatment, aspects related to the design and optimization of nanocarriers for cancer treatment, and clinical developments, including promises, safety issues, and the expected future. The editors bring together a group of scientists from all over the world to discuss the most relevant issues and to provide updates on functional lipid nanosystems and cancer.

Pembahasan yang disajikan sangat integred, yaitu menggabungkan analisis sistem, desain sistem, dan pembuatan sistem. Sistem yang dibuat adalah sistem rekam medis. Untuk desain sistem menggunakan Data Flow Diagram dan Entity Relationship Diagram. Konsep pemrograman yang digunakan dengan konsep terstruktur memakai Visual Basic.Net. Aplikasi rekam medis yang dibuat meliputi pembuatan data dokter, data pasien, data obat, diagnosa pasien, pembuatan resep pasien, pembuatan laporan, dan lain-lain. Untuk memudahkan dalam memahami materi maka setiap bahasan dilengkapi dengan latihan mandiri dan source program menggunakan Visual Basic.Net. Buku ini sangat cocok untuk kajian karya ilmiah, penelitian, modul pembelajaran, pembuatan skripsi, tesis, pengembangan proyek sebagai konsultan sistem informasi. Pembahasan dalam buku mencakup: • Alat Bantu Desain Sistem DFD dan ERD • Desain Sistem dengan Data Flow Diagram • Desain Data dengan Entity Relationship Diagram • Program Rekam Medis dengan Visual Basic.Net • Pembuatan Laporan dengan Crystal Report

This study focuses on the dynamics of community organization in contemporary Bali and of the ambivalent relationship between village institutions, adat, and those of the Indonesian state, dinas. Focusing on the banjar--the civic community in Bali--the book traces its role in serving the needs of the its members and the tensions implicit in its role as intermediary in the implementation of development policies. ""This book neither wants to make an accusation, nor impose things that are impossible to carry out. It merely wants to make the Balinese and tourists aware of what is happening in this paradise on earth and about the positive influence they can have in preserving the culture of the beautiful island of Bali. Tri Hita Karana, the spirit of Bali originated from the rich Balinese-Hindu philosophy. Tri Hita Karana means three causes of happiness: balanced and harmonious relationships of humans with God; of humans with fellow human beings; and of humans with the surrounding nature. Respect and togetherness are essential values in this philosophy. The Hindu doctrine of tat tvam asi, "I am you and you are me", teaches us that all things are connected. Humans who do not respect God, fellow humans and nature are not respecting themselves, and this will eventually lead to self-destruction. Respect and togetherness will lead to harmony and happiness. Since the Balinese are already living according to the age-old philosophy of Tri Hita Karana, they can contribute to a sustainable environment for their

children. The past and the present cannot be separated from each other; the present is born out of the past. Our actions to create a sustainable environment today matter, or in Gandhi's words: the future depends on what we do today. The authors, Jan Hendrik Peters, a former professor of service studies and Wisnu Wardana, chief-editor of Bali Travel Newspaper, are deeply concerned about the negative influences of mass tourism and want to plead for a sustainable future for Bali, by writing this book. "We really do need this book on Bali to make the Balinese people and the international tourists familiar with the essence of Hinduism. If the Balinese follow the philosophy of Tri Hita Karana as a guide in their personal life and business, it means that Bali will be the Island of the Gods forever." - Ida Pedanda Subali Tianyar, Hindu high priest, Chairman of the Council of Hindu Priests in Indonesia.""

Rev. ed. of: Indonesia edited by Frederica M. Bunge, 4th ed. 1983.

A Literary mirror is the first English-language work to comprehensively analyse Indonesian-language literature from Bali from a literary and cultural viewpoint. It covers the period from 1920 to 2000. This is an extremely rich field for research into the ways Balinese view their culture and how they respond to external cultural forces. This work complements the large number of existing studies of Bali and its history, anthropology, traditional literature, and the performing arts.

Includes entries for maps and atlases.

The Island of Bali—a true paradise is explored in this classic travelogue. From the artists and writers of the 1930s to the Eat, Pray, Love tours so popular today, Bali has drawn hoards of foreign visitors and transplants to its shores. What makes Bali so special, and how has it managed to preserve its identity despite a century of intense pressure from the outside world? Bali: A Paradise Created bridges the gap between scholarly works and more popular travel accounts. It offers an accessible history of this fascinating island and an anthropological study not only of the Balinese, but of the paradise-seekers from all parts of the world who have traveled to Bali in ever-increasing numbers over the decades. This Bali travelogue shows how Balinese culture has pervaded western film, art, literature and music so that even those who've never been there have enjoyed a glimpse of paradise. This authoritative, much-cited work is now updated with new photos and illustrations, a new introduction, and new text covering the past twenty years.

"Dokter spesialis Anestesiologi dan Terapi Intensif di Indonesia membutuhkan peningkatan kompetensi secara berkesinambungan dengan latar belakang pengetahuan dan keterampilan yang mumpuni untuk memenuhi pelayanan yang optimal. Pendidikan menjadi salah satu pilar penting dalam pembentukan dokter spesialis Anestesiologi dan Terapi Intensif yang kompeten. Buku ini diharapkan dapat mendukung pendidikan dokter spesialis dan subspecialis anestesiologi dan terapi intensif yang nantinya diharapkan memiliki bekal keilmuan yang cukup untuk memberikan pelayanan berkualitas, optimal, dan profesional di bidang anestesi dan terapi intensif." —dr. Andi Wahyuningsih Attas, Sp.An, KIC, MARS Ketua PP PERDATIN "Anestesiologi dan Terapi Intensif adalah ilmu yang berkembang dengan sangat pesat dalam dekade terakhir. Menyadari luasnya cakupan bidang ilmu tersebut, kami mengajak seluruh program studi pendidikan dokter spesialis anestesiologi dan terapi intensif serta keseminatan yang ada di Indonesia untuk terlibat dalam penyusunan buku ini. Kami berharap buku teks Anestesiologi dan Terapi Intensif ini dapat berguna tidak hanya bagi mahasiswa dan peserta didik program pendidikan dokter spesialis anestesiologi, tetapi juga bagi pengembangan keprofesian dokter spesialis dan subspecialis anestesiologi di Indonesia." —Prof. Dr. dr. Nancy Margarita Rehatta, Sp.An, KNA, KMN Ketua Tim Editor Anestesiologi dan Terapi Intensif: Buku Teks KATI-PERDATIN, Ketua Kolegium Anestesiologi dan Terapi Intensif
