Excerpt from Selected Papers on Social and Economic Questions Sir Benjamin Browne felt strongly that when the great underlying principles of life had once been discerned, they could be applied to politics, industrial questions, and private conduct alike. These were the permanent Form, into which could be moulded the material of each day's events as they arose. This necessarily involved a certain amount of repetition in his writings, because, in discussing different questions before different listeners, or in approaching them from different standpoints, he came back again and again to these underlying principles, and drove them home by reiterated blows. Reading through his scattered writings is like listening to a sonata where three or four leading themes dominate the music, emerging repeatedly in varying keys, and giving coherence to the whole. The dates when the various papers were written must of course be borne in mind, as some of the statistics, accurate at the time, may have altered. The date of each paper is printed at the head of the page. From the historic point of view, they show the consistent evolution of his Opinions. Their willingness to pay any price to uphold the honour and integrity of their Air Force meant an uphill battle against bigotry, difficult conditions of work and outdated equipment. However, showing tremendous fortitude, Harjinder and his men took the fight to the enemy and rose splendidly to the occasion. Be it the formidable Japanese, the mighty Germans or the resolute tribal warriors none could break the spirit of these airborne Indians. It is a story of relentless adventure, journeying from the scrublands of the North Western Frontier, to the jungles of Burma, to the UK on the eve of D Day and to the corridors of power in an independent India. The resourcefulness of the Indians and their sheer skill and determination meant that they could overcome the myriad of challenges thrown at them, much to the surprise and dismay of some officers of the Raj. It is a story of mutual respect forged and strengthened across lines of religion, caste, creed and race, as the Indian's undeniable courage and resilience won even the hearts and minds of their British counterparts and one man was the center of it all. Harjinder's is a life of intense friendship, of great ingenuity and of hard-work and dedication, interspersed with the humor and merriment that is ever present in the military environment. It was a bottom to top career for the lowly Hawaii Sepoy who went on to become one of the top officers of the IAF. He is credited with the endeavor to make the Indian Air force self-reliant and designed, built and test flew two different aircraft to prove his point. He was one of the driving forces behind making the Indian Air Force the 4th largest in the world, an astonishing feat given the twin challenges of nation building and partition. Thus the only 'disgrace' to emerge from this book is how Harjinder's story could remain untold for so long.
