The International Guide to Student Achievement brings together and critically examines the major influences shaping student achievement today. There are many, often competing, claims about how to enhance student achievement, raising the questions of "What works?" and "What works best?" World-renowned bestselling authors, John Hattie and Eric M. Anderman have invited an

international group of scholars to write brief, empirically-supported articles that examine predictors of academic achievement across a variety of topics and domains. Rather than telling people what to do in their schools and classrooms, this guide simply provides the first-ever compendium of research that summarizes what is known about the major influences shaping students' academic achievement around the world. Readers can apply this knowledge base to their own school and classroom settings. The 150+ entries serve as intellectual building blocks to creatively mix into new or existing educational arrangements and aim for quick, easy reference. Chapter authors follow a common format that allows readers to more seamlessly compare and contrast information across entries, guiding readers to apply this knowledge to their own classrooms, their curriculums and teaching strategies, and their teacher training programs.

Writing Centers at the Center of Change looks at how eleven centers, internationally, adapted to

change at their institutions, during a decade when their very success has become a valued commodity in a larger struggle for resources on many campuses. Bringing together both US and international perspectives, this volume offers solutions for adapting to change in the world of writing centers, ranging from the logistical to the pedagogical, and even to the existential. Each author discusses the origins, appropriate responses, and partners to seek when change comes from within a school or outside it. Chapters document new programs being formed under changing circumstances, and suggest ways to navigate professional or pedagogical changes that may undermine the hard work of more than four decades of writing-center professionals. The book's audience includes writing center and learning-commons administrators, university librarians, deans, department chairs affiliated with writing centers. It will also be useful for graduate students in composition, rhetoric, and academic writing.
