This book discusses the economic and geopolitical effects of globalization from historical and institutional perspectives. While it has had unintended consequences, such as displacing developed countries' dominance of production markets, the overall benefits of globalization far outweigh the costs. Moak argues that leading developed nations should not fear globalization but, instead, make concerted efforts to promote it in order to keep the cost-benefit balance weighing in favor of economic enhancement and geopolitical stability. Having incurred huge private and public debts as well as a weak monetary policy posture, many developed nations have been unable to recovery from the 2008 financial crisis. Moreover, geopolitical tensions are rising due to the power rivalry between the United States, China, and Russia over a host issues, including trade imbalances and geopolitics. This book aims to provide stakeholders with the relevant and necessary information to hold an objective debate on globalization.

Ultimately, this book is about globalization— what it is, how it impacts the global economy and polity, and why it is needed now more than any other time in human history.

Kasper is a master synthesiser, and his display of erudition alone makes this book a worthy read and an invaluable resource for questions of God and Trinity. Using admittedly polemical language, he calls for a 'theological theology' which makes the explanation of the confession of the triune God its first priority, not only for speculative but also for pastoral reasons. This is the reissue of a theological work of considerable importance for which Cardinal Kasper has written

an entirely new introduction taking modern developments in theology fully into account.

"What can guilt, the painful sting of the bad conscience, tell us about who we are as human beings? Being Guilty seeks to answer this question through an examination of the views of Kant, Schelling, Schopenhauer, Paul Rée, Nietzsche, and Heidegger on guilt, freedom, responsibility, and conscience. The concept of guilt has not received sufficient attention from scholars of the history of German philosophy. Being Guilty addresses this lacuna and shows how the philosophers' arguments can be more deeply grasped once read in their historical context. A main claim of the book is that this history could be read as proceeding dialectically. Thus, in Kant, Schelling, and Schopenhauer, we find variations on the idea that guilt is justified because the human agent is a free cause of his or her own being—a causa sui—and thus

responsible for his or her "ontological guilt." In contrast, in Rée and Nietzsche these ideas are rejected and the conclusion is reached that guilt is not justified, but is explainable psychologically. Finally, in Heidegger we find a synthesis of sorts, where the idea of *causa sui* is rejected, but ontological guilt is retained and guilt is seen as possible, because for Heidegger a condition of possibility of guilt is that we are ontologically guilty yet not *causa sui*. In the process of unfolding this trajectory, the various philosophers' views on these and many other issues are examined in detail"--
